

McCOMBS SCHOOL OF BUSINESS

Salem Center for Policy

Project

David Puelz

October 24, 2023

Project

The days of the presentations will be:

→ November 28

→ December 30

*order of presentation will be randomly assigned among groups

The days of the presentations will be:

→ November 28

→ December 30

*order of presentation will be randomly assigned among groups

There are two components of the project:

(1) **Presentation**: either using powerpoint, beamer, or Rmarkdown slides. 15min long, states your question, data, findings, and conclusion, as if you were presenting your results to your boss.

(2) **Write-up**: using Rmarkdown, like our homework but very polished with pretty figures and descriptive prose. Like the beginnings of an academic paper.

*breakdown: 25% (1) + 75% (2)

- The project will revolve around a question of interest to **you!**
- You can either **replicate an existing paper** or **answer your own empirical question** using data that you figure out how to find and the tools we've learned in this class.
- If you choose **replication**, I expect your numbers will exactly match the published paper and it is fully replicated. If you choose your **own question**, you are free to analyze the data how you wish.

Important dates:

Oct 25 – group formation (≤ 2 people) and project approval

Nov 28, Nov 30 – class presentations

Dec 5 – project write-ups due

- Start thinking about your project and finding data soon! **This will often take the most time**
- Feel free to ask me questions as you start to formulate your question of interest
